To build future focussed skills suitable for the educated youth of the NER

To create a G2G bridge and a G2C bridge across the NE region.

To run a common and successful consultative service centre for the entire region.

To introduce civil society inputs into public policy & development

To track the LMIS in the entire region and neighbouring employment pockets

To track, record and intervene in the carbon footprint management of the region including the effect from neighbouring countries.

To liaise with industry and employers for finding long-term localized employment options.

To act as a hub for collecting, documenting and archiving local & traditional knowledge.

To use predictive data analysis for forecasting emerging patterns in public thought, social, ecological, economic and regional cooperation trends.

To create knowledge and implementation modules for farm, non-farm, financial and demographical projects.

To work as a common impact analysis centre for various projects that are state owned but have common impact on the NER.

To fill the information, innovation and inclusion gaps both in governmental & civil society communities.

To create interactive global platform for education, employment and fund-flow to and from the NER.

To be a youth led total-solutions program centre for future focussed development.
