

SCHEMATIC DRAWING OF THE TANJUN WONDERBAMBOO TINY HOME (13'X16')

any size anywhere prefab living solutions in engineered bamboo

We know that your heart desires just that little space you can call your very own, that little hideaway where you previously only had a plot of land or a roof, that den where your friends could gather to some music without a care, that attic on the roof where you could study alone.

So we came up with the Bamboo Prefabricated Tiny Home made of preengineered components from the toughest structural Bamboo culms grown in Assam.

These homes are what we call the final frontier of mass housing in a densely populated country like ours. These zero carbon footprint homes are made from long lasting (70+ yrs) treated Bamboo and Ferroconcrete composite material and have clean cooking unit, sanitation & bio-septic disposal systems.

They can be quickly fitted into electricity and water mains with their own storage facility. They come with built in solar power backup and can be easily hooked to a rainwater harvesting pit. These little homes also come with their own foldout interaction spaces and are fitted with a healthy exercise unit, herb garden, waste bin and gathering barrow.

YOUR QUICK & EASY

- OUTHOUSE
- STREET SHOP
- EXTRA ROOM
- STUDY
- DEN
- CAMP SITES
- GUARD QUARTER
- TRANSIT HOME
- COUPLE LIVING
- FARM HOME
- RESORTS
- GATEWAYS
